
SIGATOKA IRONSANDS PROJECT – APPROVAL OF EIA REPORT

Dome Gold Mines Limited (“Dome” or “the Company”) (ASX: DME) is pleased to announce that the Environmental Impact Assessment (EIA) for the Sigatoka Ironsands Project on SPL 1495 in Fiji received formal approval from the Fiji Department of Environment on October 8, 2015. The approval of the EIA is an important milestone required for submission of an application for a Mining Lease at Sigatoka.

Dome now proposes to move as quickly as possible to finalise and submit an application for a Mining Licence at Sigatoka.

ABOUT DOME

Dome is an Australian mining company, which listed on the ASX on 22 October 2013. The Company is focussed on gold, copper and mineral sands in Fiji, where it holds four highly prospective exploration tenements. The Company’s objective is to become a major force in the mining industry of Fiji by the discovery and development of mineral resources within its Fijian tenements.

On 25 August 2014 Dome shareholders approved the merger of Dome with Magma Mines Ltd, owner of the Sigatoka project and this is now the Company’s flagship project in Fiji. Sigatoka is a mineral sand project containing abundant heavy metals including magnetite. Drilling to establish an interim resource estimate for the project has been completed, and further drilling is expected to enhance the resource base substantially. Commencement of production at Sigatoka by conventional dredging and wet processing is anticipated within two years.

Our other projects are the Ono Island epithermal gold project and Nadrau porphyry copper-gold project, which may be like that at the nearby Namosi Project

Dome’s Board and Management team has a high level of experience in Fiji, and Dome has been actively exploring in Fiji since 2008.
