8.6 Total available funding (Item 8.4 + Item 8.5)	395
8.7 Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	1

8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:

1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer:

The Company does not expect to have the current level of net operating cash flows in the coming quarters due to this quarter's figures including two large payments; one is an annual insurance fee (\$76k) and the other, is an annual licence fee (\$132k). As such, if the above estimates are recalculated without the two large payments above, it would result in the following estimated quarters of funding available:

Net cash from / (used in) operating activities (Item 1.9)	(157)
Capitalised exploration & evaluation (Item 2.1(d))	(22)
Total relevant outgoings (Item 8.1 + Item 8.2)	(179)
Cash and cash equivalents at quarter end (Item 4.6)	395
Unused finance facilities available at quarter end (Item 7.5)	-
Total available funding (Item 8.4 + Item 8.5)	395
Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	2

The Company has taken steps to reduce its corporate costs including implementing a 50% reduction in salary and fees for the CEO and Non-Executive Directors and a 25% reduction for the Executive Director and remaining Staff member.

Due to restricted operations due to the COVID -19 pandemic the Company forecasts have limited exploration activity for the time being and all other non-essential corporate costs have ceased.

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Yes, the Board discusses the Company's funding and future prospects regularly and is currently considering its options with regard to realising value through a percentage divestment of its exploration assets and also undertaking reviews of potential new projects which would result in additional working capital for the Company. The Board also has the option to raise additional funds via the Company's Equity Placement Capacity which is available to the maximum of 25%.

Global markets are at this point in time experiencing instability, as is the whole oil and gas industry, as such there is no certainty in any direction the Company may choose to take. However, the Company is in discussion with industry peers and its corporate funding advisors who indicate that there is sufficient interest in the Company to be able to follow one of the above paths.

Answer:

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

Yes, for the reasons noted in 1 and 2 above. The Company is continuing with only essential expenditure and is assessing opportunities to maximise the value of the Company's existing assets and complementary energy opportunities.
